

Ethiopian Digital Guarantee Network — EDGN

National Configurable Digital Guarantee, Verification,
Dispute Resolution & Legal Enforcement Infrastructure

PART I — NATIONAL PROPOSAL

CHAPTER 1 — EXECUTIVE SUMMARY

1.1 Project Overview

Ethiopian Digital Guarantee Network (EDGN) በኢትዮጵያ የGuarantee/Bond አገልግሎትን ከመጀመሪያ ማመልከቻ እስከ መስጠት፣ ማረጋገጥ፣ ማሻሻል፣ ማራዘም፣ Claim፣ Dispute Resolution፣ Legal Escalation፣ Court Process፣ Settlement እና Release ድረስ በአንድ የተዋቀረ ዲጂታል መዋቅር የሚያገናኝ **National Digital Infrastructure** ነው።

EDGN የተለያዩ ባንኮች፣ የፌዴራልና የክልል መንግሥት ተቋማት፣ Procurement ስርዓቶች፣ Customs፣ Revenue፣ Courts እና Businesses በአንድ trusted digital ecosystem ያገናኛል።

1.2 The National Challenge

የGuarantee ሂደት በተለያዩ ተቋማትና የስራ ሂደቶች የተበታተነ ሲሆን፣ የGuarantee መረጃን ማመንጨት፣ ማረጋገጥ፣ መከታተል እና በclaim/dispute ጊዜ ማስተዳደር የተዋሃደ የdigital infrastructure አጥረት ሊያጋጥም ይችላል።

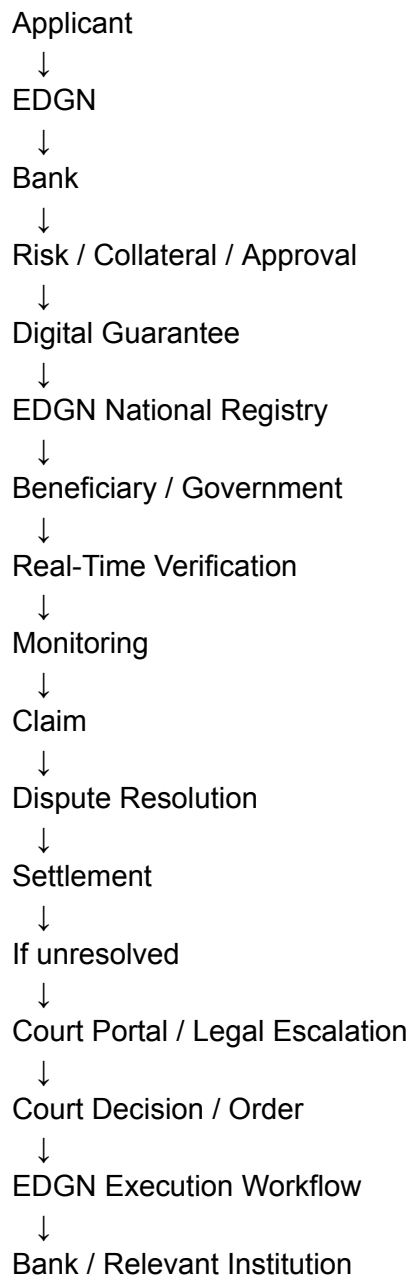

ዋና ችግሮች፦

- Paper-based/manual processes
- የGuarantee authenticity ማረጋገጫ መዘግየት
- የFraud አደጋ
- ተቋማት መካከል የsystem interoperability አጥረት
- የGuarantee lifecycle በአንድ ቦታ አለመታየት

- Claim እና dispute ሂደት መዘግየት
 - የAudit trail እና evidence management ክፍተት
 - Bank/Government verification ላይ የmanual dependency
-

1.3 The Proposed Solution

EDGN ይህን ሂደት ወደ **end-to-end digital lifecycle** ይቀይራል።

1.4 National Scope

EDGN እንደ የGuarantee ዓይነት ላይ ብቻ አይገደብም። nconfiguration ሊጨመሩ የሚችሉ የGuarantee Products ይኖሩታል።

Procurement

- Bid Bond
- Performance Guarantee
- Advance Payment Guarantee
- Retention Guarantee
- Other configurable procurement guarantees

Customs

- Customs Bond
- Customs Duty Guarantee
- Transit Guarantee
- Customs Dispute-related Guarantee
- Other customs guarantees

Government Property

- Rental Bid Security
- Rental Performance Guarantee
- Lease-related Security

Construction

- Performance
- Advance Payment
- Retention
- Completion/Warranty-related guarantees

Trade & Commercial

- Payment Guarantee
- Supplier Credit Guarantee
- Import/Commercial Guarantees

Financial

- Financial Guarantees
- Credit-related Guarantees
- Other bank-approved guarantee products

International

- Foreign Bid Bond
- Foreign Performance Guarantee
- Foreign Advance Payment Guarantee
- Counter-Guarantee

Legal / Court

- Guarantee verification
 - Claim/dispute evidence
 - Legal escalation
 - Court order workflow
 - Execution tracking
-

1.5 The Core Innovation

የEDGN ትልቁ ልዩነት **Configuration-First Architecture** ነው።

ማለትም አዲስ Guarantee ሲመጣ ሙሉ system እንደገና develop ማድረግ ሳያስፈልግ፦

Product → Rules → Workflow → Documents → Fees → Approval → Claim → Release

reconfiguration ይዘጋጃል።

ለምሳሌ፦

Guarantee Product:
Performance Bond

Amount Rule:
10% of Contract Value

Validity:
Contract Period + Configured Grace Period

Collateral:
According to Bank Policy

Approval:
Configured Approval Levels

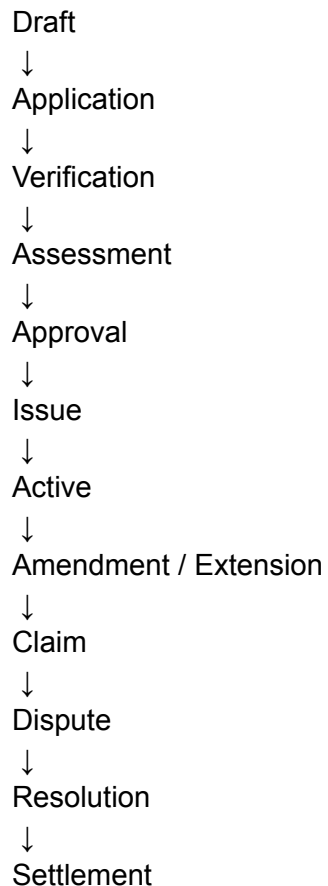

Claim:
Configured Claim Rules

Release:
Configured Release Rules

ይህ EDGNን **future-proof national platform** ያደርገዋል።

1.6 End-to-End Guarantee Lifecycle

EDGN የGuarantee ህይወትን መሥራታ ይከታተላል።

↓
Release
↓
Closed / Expired

1.7 Dispute Resolution

ይህ የEDGN ዋና module ይሆናል።

Claim ከተነሳ በኋላ ተቋማቱ ካልተስማሙ፦

Claim
↓
Dispute Opened
↓
Bank Response
↓
Beneficiary Response
↓
Evidence Exchange
↓
Review / Mediation / Settlement
↓
Resolved?
| — YES → Settlement / Release
|
| — NO → Legal Escalation
↓
Court Portal

ስለዚህ Court የመጀመሪያ መዳረሻ አይሆንም፤ **dispute resolution** → **legal escalation** → **court** የሚል ቅደም ተከተል ይኖራል።

1.8 Court Integration

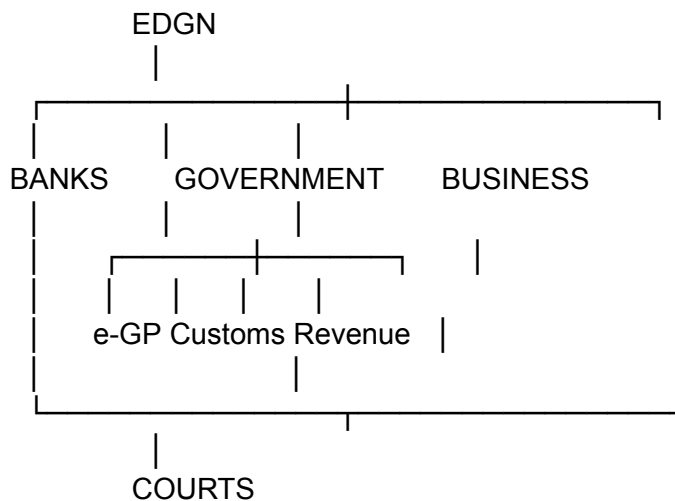

Court Portal የEDGNን Guarantee record ከLegal Case ጋር ሊያገናኝ ይችላል።

Guarantee ID
↓

Dispute ID
↓
Legal Escalation ID
↓
Court Case ID
↓
Court Order
↓
EDGN
↓
Execution Status

EDGN የCourt የፍርድ ስልጣንን አይተካም። የተፈቀደውን የCourt ትዕዛዝ ወደ ተገቢው የexecution workflow ለማስተላለፍ የdigital infrastructure አቅርቦት ይሆናል።

1.9 Stakeholder Ecosystem

ዋና Stakeholders

- Banks
- Government institutions
- Procurement ecosystem
- Customs
- Revenue authorities
- Courts
- Businesses
- Contractors

- Suppliers
 - Importers/Exporters
 - Other authorized institutions
-

1.10 National Benefits

Government

- Real-time visibility
- Better verification
- Better auditability
- Reduced manual processing

Banks

- Standardized digital integration
- Better lifecycle monitoring
- Reduced operational friction
- Better risk/collateral workflow integration

Businesses

- Faster application
- Digital tracking
- Reduced paperwork
- Easier verification

Courts

- Structured guarantee evidence
- Digital case linkage
- Traceable execution workflow

National Economy

- Increased trust
 - Reduced fraud opportunities
 - Faster commercial transactions
 - Improved digital financial infrastructure
-

1.11 Strategic Positioning

EDGN እንደ **single-purpose Bid Bond platform** እይቀርብም።

እንዲህ እንቀርጽዋለን፦

EDGN is a national digital trust and interoperability infrastructure for the complete lifecycle of guarantees across banking, government, commerce, customs and legally authorized enforcement processes.

ይህ አቀራረብ ወደፊት እዲስ Guarantee Product ወይም እዲስ Government Institution ሲጨመር መሠረታዊ architecture ሳይቀየር ማስገባት ያስችላል።

1.12 Success Indicators

የፕሮጀክቱ ስኬት በሚከተሉት KPIs ይለካል፦

- Digital Guarantee adoption rate
 - Verification turnaround time
 - Number of participating banks
 - Number of participating government institutions
 - Number of digital guarantees issued
 - Number of API transactions
 - Claim resolution time
 - Dispute resolution time
 - Fraud incidents detected/prevented
 - System availability
 - Audit completeness
 - Customer satisfaction
-

1.13 Implementation Principle

EDGN “**Big Bang**” በሚባል እንድ ጊዜ ሁሉንም ለመጀመር አይገደድም።

የምንከተለው፡

Pilot → Validate → Integrate → Expand → National Scale

ይሆናል።

Initial MVP

1. Bid Bond
2. Performance Guarantee
3. Advance Payment Guarantee
4. Digital Verification
5. Bank Portal
6. Beneficiary Portal
7. Core Guarantee Registry

ከዚያ፡

Customs → Government Property → Trade → Dispute → Court → National Expansion

1.14 Conclusion

EDGN የተለያዩ Guarantee processes ን ብቻ የሚያደራጅ system ሳይሆን፣ ባንኮች፣ መንግሥት፣ ንግድ ድርጅቶች እና በሕግ የተፈቀዱ የLegal/Court processes በአንድ የdigital trust layer እንዲገናኙ የሚያደርግ **National Digital Infrastructure** ነው።

Application → Guarantee → Verification → Claim → Dispute Resolution → Legal Escalation → Court → Execution → Settlement → Release

ይህ ነው የEDGN ዋና የend-to-end vision።
